

Multicraft Maintenance Technician

Quadrant Engineering Plastic Products is seeking an experienced Multicraft Maintenance Technician to perform electrical and mechanical maintenance throughout the facility.

Health & Safety and Sustainability are core values for us at Quadrant and at the center of how we work - we call it "KAITEKI, the sustainable well-being of people, society and our planet Earth".

Primary Responsibilities:

- Perform electrical and hydraulic repairs
- Troubleshoot, repair, calibrate and maintain mechanical and electronic control / instrumentation systems.
- Troubleshoot hydraulic and pneumatic circuits and controls
- Operate basic machine shop equipment

Qualifications and pre-requisites:

- Associate degree specializing in Electrical, or equivalent field; or Five (5) years industrial Electrical experience with Journeyman's Certification.
- Experience in electrical, electronic controls, mechanical, hydraulics, pneumatics, logic and basic PLC systems.
- Industrial or manufacturing experience desired.

Schedule: 3/2/2 twelve (12) hour night shift (7pm –7am)

Apply in person by completing a Quadrant application at the Local Workforce Center. Resumes may be emailed to teresa.duncan@qplas.com or faxed to 276-228-0113.

Equal Opportunity Employer, M/F/V/D
